

# New Healthier SG Care Protocols

(w.e.f 1 Jan 2025)

## 3 Key Changes at a Glance

I

6 new Care Protocols have been introduced<sup>[1]</sup>

**Annual Service Fee (ASF) Fixed Payment** will be provided for enrollees with these 6 chronic conditions. For Healthier SG clinics to receive the full Cardiometabolic, Diabetes, or Respiratory bundle payment, each enrollee must complete the respective bundle based on his/her chronic condition(s) and submit the required care reporting fields.

GPs can view all Care Protocols and required care reporting fields (marked with asterisk\*) in [Primary Care Pages](#).

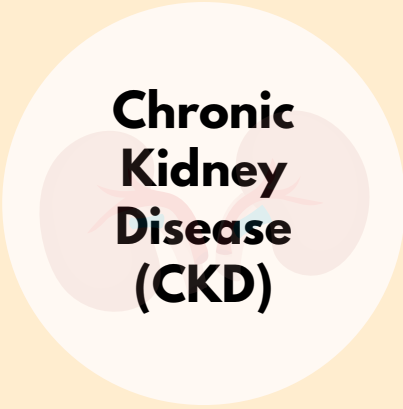

**Stable Ischaemic Heart Disease (IHD)**

**Stable Stroke**

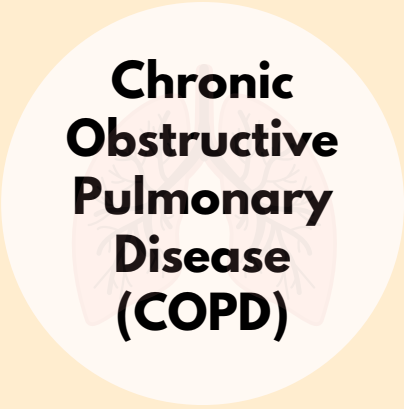

**Gout**

**Chronic Kidney Disease (CKD)**

**Asthma**

**Chronic Obstructive Pulmonary Disease (COPD)**

II

**New conditions added to Cardiometabolic bundle (i.e. ASF Variable Payment)**

\$ 30

Stable IHD, Stable Stroke and CKD will be categorised under the Cardiometabolic bundle. Please refer below for the number of readings required for the selected cardiometabolic conditions.

Enrollees with multiple CDMP conditions must complete the tests and care report submissions for every CDMP condition they have, in order for the GP to qualify for payment under the Cardiometabolic bundle.

The same care components can fulfil care requirements across multiple Care Protocols. E.g. an enrollee with both DM and HTN only needs 2x BP measurement, not 4x BP measurement in a year, within the same ASF assessment period.

<b>NEW</b> <b>Stable IHD</b> <sup>[2,3]</sup>	<b>NEW</b> <b>Stable Stroke</b> <sup>[2,3]</sup>	<b>NEW</b> <b>CKD</b> <sup>[2,3]</sup>	<b>Diabetes</b> <sup>[3]</sup> (DM)	<b>Hypertension</b> <sup>[3]</sup> (HTN)	<b>Hyperlipidemia</b> (HLD)	<b>Pre-DM</b>
<ul style="list-style-type: none"><li>LDL-C x1</li><li>Blood Pressure Measurement x2</li><li>Kidney Assessment Results x1 *</li></ul>	<ul style="list-style-type: none"><li>LDL-C x1</li><li>Blood Pressure Measurement x2</li></ul>	<ul style="list-style-type: none"><li>Blood Pressure Measurement x2</li><li>Kidney Assessment Results x1 *</li></ul>	<ul style="list-style-type: none"><li>LDL-C x1</li><li>Blood Pressure Measurement x2</li><li>HbA1c x2</li><li>Kidney Assessment Results x1 *</li></ul>	<ul style="list-style-type: none"><li>Blood Pressure Measurement x2</li><li>Kidney Assessment Results x1 *</li></ul>	<ul style="list-style-type: none"><li>LDL-C x1</li></ul>	<ul style="list-style-type: none"><li>LDL-C x1</li><li>Blood Pressure Measurement x1</li><li>HbA1c x1 or FPG x1 or OGTT x1</li></ul>

\*Kidney Assessment results should include: Serum Creatinine or eGFR x1 and Urine ACR or Urine PCR x1

III

**Introduction of Respiratory bundle (i.e. ASF Variable Payment)**

\$ 10

### Required data fields under Respiratory bundle

<b>NEW</b> <b>Asthma</b> <sup>[3]</sup>	<b>NEW</b> <b>COPD</b>
Date of GINA Test Done	Date of COPD Assessment Test (CAT) Done
GINA Score (x2)	CAT Score (x1)

[1] GPs can view the recordings of all Care Protocol webinars at College of Family Physicians Singapore (CPFS) website, under [Healthier SG Care Protocols](#).  
[2] If the patient with Stable IHD, Stable Stroke or CKD concurrently has DM OR Pre-DM OR is being screened for DM, please refer to the respective [DM](#), [Pre-DM](#) and [CVRA](#) screening Care Protocols listed in Primary Care Pages for more information on whether HbA1c or FPG is tied to payments.  
[3] For components that are done twice, tests should be conducted at least 3 months (92 days) apart to be eligible for payments.
